*AGI affiliated glazing contractors serve owners and construction managers with glass and metal solutions delivered on time and on budget. AGI member contractors and craftworkers are qualified to handle all interior and exterior architectural glass and metal applications. From design consultation and constructability reviews through final fabrication and installation, AGI members raise the bar for creativity, quality, safety, and value.*

### ABOUT THE COMPANY

Pat McIntyre founded Synergy Glass and Door Service, LLC, in 2012, motivated by "what if." He wanted to work for a company that provided for his and his employees' families while offering the highest level of customer service. Over the past eight years, he and his team have built Synergy into a leading glazing subcontractor, able to handle any type of glass and metal work with unparalleled 24-hour service and response times. "Synergy pays close attention to the small things that ultimately make our work stand out," McIntyre says.

Synergy has held North American Contractor Certification since 2016. The ANSI-accredited, third-party credential recognizes

the company's leadership in glazing craftsmanship, safety, and business practices. The company also holds the Transportation Worker Identification Credential (TWIC®), required for workers to access secure areas of the nation's maritime facilities, and a Non-Gaming License for glaziers to perform work in active casinos. Most of Synergy's installers have 10+ years of industry experience.

## PRIORITIZING SAFETY

Synergy also provides custom plastics. The company designs, manufactures, and installs personal protective equipment (PPE) to support businesses struggling with the challenges of Covid-19. Synergy hopes this service will help more people come back to work – and go home to their families – safely.

## NOTABLE PROJECTS

Synergy completes hundreds of projects each year. Recent work has included a seven-floor interior fit-out for the coworking brand SPACES in Philadelphia. The scope included interior glass, custom framing, historic doors retrofit with custom white boards, and a custom tempered glass and metal conference table. Synergy also completed a multi-phased project for Culbertson Elementary School in Newtown Square, Pa., comprised of pre-glazed windows, curtainwall, storefront, and fiber-reinforced polymer (FRP) openings. Additional recent projects involved interior glazing for the Electrical & Systems Engineering Department at the University of Pennsylvania; and folding doors for Ridley Marina Restaurant in Ridley, Pa.

## COMMUNITY SERVICE

According to colleagues, McIntyre "is one of the most generous people you will ever meet," who extends his giving spirit to Synergy's charitable acts. The company supports Cleaning for a Reason® and Helen's Angels, two nonprofits that improve quality of life for cancer patients. Synergy also adopts families during the holidays, supports youth sports, and donates to local schools.

## LIKE FAMILY

As a family-owned certified small business, Synergy emphasizes service and treating every client like family. "Honesty goes a long way in this business," explains McIntyre. "Just do your job, do it right, and your customers will love you for it. It's that simple."
